Why making it with Patons makes it really worthwhile . . .

Every year Patons makes up thousands and thousands of garments to ensure that each individual pattern is perfected in every size stated and **every Patons yarn specified** — of vital importance to the shape of your finished garment.

And once in shape — always in shape because it resists shrinking and stretching. Patons promise it. With over 180 years of experience to draw on, the people at Patons don't pay lip service to quality, they work at it constantly. That's why making it with Patons makes it really worthwhile.

Patons Azalea — a fine, lightweight yarn with a firm twist that gives a very smooth finish to handknits. A family favourite that has retained its popularity with knitters who love the finer yarns.

MAKE UP

With a slightly damp cloth and warm iron, press lightly. Using back-stitch, sew up side and sleeve seams. Press seams.

Pressing Crochet—It is not necessary to press most crochet stitches, as pressing tends to flatten the appearance of the stitch. However, if pressing should be necessary, this should be done very carefully from the wrong side of the work. Use a damp cloth and warm iron, and do not let the full weight of the iron fall on the garment—steam, rather than press. **Synthetic yarns should not be pressed at all.**

IMPORTANT — DYE LOTS !

Always buy enough of the same dye lot at the one time for a complete garment, as a variation between dye lots can occur.

Retain ball bands until the garment is completely knitted, and, in the event of an enquiry concerning the purchase, submit all ball bands.

WASHING—Do not pre-soak as is recommended with some detergents containing enzymes. Washing powders approved by the Australian Wool Corporation should be used for wool garments. A mild detergent should be used for synthetic garments.

RINSING—Rinse garment thoroughly with warm (not cold) water, until the water is clear. Support your garment with both hands whenever you lift it to prevent stretching.

DRYING—After the last rinse, spin dry the garment or squeeze it between towels to remove excess water. Dry naturally on a flat surface out of direct sunlight. **Never hang a hand-knitted garment**. When drying colour-contrast knitteds, do not leave contrasting areas in contact with each other in the wet or damp state.

On sewing days - use only Coats Drima

Sew by hand or machine—
confident that multi-purpose
Coats Drima will take the
strain on any fabric.

Coats Drima is strong
because it's spun polyester,
finer because polyester's
so strong. Stitches almost
invisible so it's easier
to match fabric colours
(though there's a wide colour
range). Has inbuilt elas-
ticity that flexes with

stretch fabrics. It's rot-
proof, so ideal for zones
such as underarm seaming.
No problem to iron, but do
avoid using your iron at
very high temperatures.
Extreme heat isn't good for
your fabrics anyway.

Drima is quality consistent
to ensure easier needle
threading, smoother sewing.
2 Spool sizes: 100 and
300 yards.

Variations in specified yarn quantities for garments.

Knitters occasionally comment that the quantity of yarn recommended for a garment varies from the amount they actually use. One major reason for this is that no two people knit or crochet in exactly the same way.

When we specify a quantity of yarn for a particular garment, we are stating a figure that is the end result of having each individual design made by as many as six different knitters.

The average quantity determined by this check knitting is regarded as the most satisfactory figure for that particular garment, knitted at the **correct tension** * to the measurements specified and in the actual yarn recommended. Naturally, if you decide to change the body or sleeve length **you must allow for an adjustment to the quantity of yarn.**

* **Correct tension**—see tension instructions for each design in this book.

SOME IMPORTANT HINTS

CROCHET TENSION TEST

Before you start your garment, take the yarn and hook specified in the instructions and make a chain 4 to 5 inches (10 to 13 cm) long. Work 1 square in whatever stitch is mentioned in the Tension paragraph of your instructions. With pins, mark out the number of stitches (or patterns) and rows quoted in the Tension. With a tape measure, check the distance between the pins and compare with the tension given in the instructions. If your tension is too loose (i.e. if the piece measures more than the measurement given), try a size finer hook. If your tension is too tight (i.e. if the piece measures less than the measurement given), try a size larger hook. If more than one size of hook is recommended in the instructions and you have altered your hook to correct the tension, corresponding alterations must be made to hooks throughout the instructions.

KNITTING TENSION TEST

Take the needles and yarn specified in the instructions, cast on 20 stitches and knit a square in stocking stitch. Check the tension **very accurately** by placing a tape measure along the stitches—marking the inch (or inches) with pins and counting the number of stitches to the inch or inches. If you get too many stitches to the inch your tension is too firm—try a size larger needle. If you get too few stitches to the inch your tension is too loose—try a size smaller needle.
